

DIY Synth Workshop

SYNTHPLEX™

Date: Friday, March 29, 2019
Time: 9:00AM - 11:00AM
Facilitator: Stephen McCaul & Kris Kaiser
Location: DIY Room A in hotel

Arcoid Conloco Ipsissium DIY Kit Overview:

The Arcoid Conloco Ipsissium is a brand new DIY Eurorack power-supply unit from Noise Engineering. ACI is perfect for small cases: DIY lunch-box cases, 60-hp skiffs, or other tiny portable cases are well suited for this PSU. Arcoid Conloco Ipsissium mounts through the case (there is no front-mount connector) so you don't lose any hp to power. This kit is all inclusive of parts: you'll leave the workshop with a ready-to-mount power supply, ribbon cable to connect up to 8 modules, power connector to mount to your case, and power brick.

About Noise Engineering:

Stephen founded Noise Engineering as a hobby when a friend re-introduced him to the world of modular synths in 2014. A few short years later, both Stephen and his wife Kris threw caution to the wind and took NE full time. Together, they design innovative products in Eurorack, 5U, and software. In the Eurorack space, they strive for character in a small footprint, and are not afraid to use digital when it works, or analog when it's the better choice. www.noiseengineering.us

Power specs for the Arcoid Conloco Ipsissium:

+12v: 750 mA
-12v: 750 mA
5v: 2 A

Skill level required:

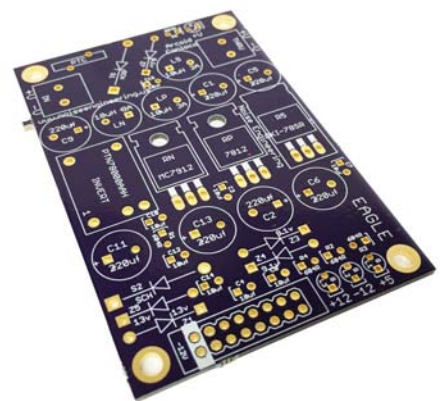

Beginner to intermediate

Class Size:

12 People maximum

DIY Class Price:

\$150.00 plus Eventbrite fees. Price includes all required tools & instructions.
